Property Description

This tropical Bali infused villa is nestled among the jungles of Hatillo, Costa Rica. Custom built in 2018, it is modern and tropical, with decorative stonework and Bali décor elements. Located on 3.5 acres of lush jungle, this property features a large stone Buddha, carved entrance guards, and a water table at the front, making you feel like you're on a vacation to Bali year-round. It features several of the components potential buyers are seeking: beautiful sunset views, a lush rainforest setting, a large pool, secluded, minutes to the beach, and nearby many of Southern Costa Rica's famous attractions. While this private home is currently a two-bedroom villa, it can easily be added to. The kitchen and living room meld together with splashes of blue and green and high-end wooden furniture from Swiss Hardware. The high-vaulted ceilings add just the right touch of Costa Rica design, allowing the breeze from your jungle to float in easily.
